**Subject:** Action Subject: Nuclear Evacuation Zones

May 23, 2012 (11:45 am)

OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

Your Action Content  
To Whom It May Concern:

Please expand the Nuclear Evacuation's first tier from 10 to 25 miles and add a second tier of 25-50 miles. A Japanese woman said last week that the Fukushima situation is much worse than expected. She or one of her associates said that as many as over 40 million Japanese might have to evacuate. Nuclear power plants, then, should be prepared for a huge catastrophe with hundreds of square miles evacuated.

A question regarding this: how would people without cars be evacuated?

Thank you for your consideration,  
Katharine Tussing
