OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

Face it: people are going to die.

You should have accurate assessment of the true effects of the catastrophes in Russia and Japan (unlike the public) and you are aware that the better you do your job, the fewer people will die. Will heads roll if you come up short and a disaster happens here? Probably not. So your conscience is the deciding factor on how REAL your evacuation plans are. Do the best you can, please.
