ANP-1064NP, Revision 1, "U.S. EPR Piping Analysis and Pipe Support Design Topical Report"

Attached for the NRC's information is Revision 1 to AREVA NP Inc. (AREVA NP) topical report ANP-1064NP, Revision 1, "U.S. EPR Piping Analysis and Pipe Support Design Topical Report." The NRC reviewed and approved this topical report in Reference 1. AREVA NP submitted the approved version of this topical report to the NRC in Reference 2. Revised pages from this topical report were sent to NRC in Reference 3 to support the AREVA NP response to RAI 365 Question 05.02.01.01-5 which changed references from the 2001 edition of the ASME Code, 2003 Addenda to the 2004 edition of the ASME Code (no addenda) consistent with the revised rule in 10CFR50.55a(b)(1). AREVA NP believes that since the purpose of this revision is to reflect to information that has already been approved generically by rulemaking in 10CFR5055a(b)(1) and was previously submitted and reviewed by the NRC as part of an RAI response, the staff's conclusions in the safety evaluation report (SER) for this topical report are unchanged and a revision to the SER is not required.

The topical report revision is provided on the enclosed CD and is non-proprietary.
