MEMORANDUM TO: Matthew A. Mitchell, Chief  
Policy and Support Branch  
Japan Lessons-Learned Project Directorate  
Office of Nuclear Reactor Regulation

FROM: John V. Kauffman, Senior Project Manager /RA/  
Policy and Support Branch  
Japan Lessons-Learned Project Directorate  
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF MAY 3, 2012, PUBLIC MEETING ON  
PRELIMINARY PLANS FOR THE IMPLEMENTATION OF TIER 3  
RECOMMENDATIONS RELATED TO THE FUKUSHIMA  
DAI-ICHI NUCLEAR POWER PLANT ACCIDENT

The U.S. Nuclear Regulatory Commission (NRC) staff held a public meeting on May 3, 2012. The purposes of this meeting were to brief stakeholders on the staff's preliminary plans for implementation of the Tier 3 recommendations, provide an opportunity for stakeholders and the NRC staff to exchange information on the Tier 3 recommendations, and afford stakeholders an opportunity to ask the NRC staff clarifying and amplifying questions on the plans and provide input for consideration before the plans are finalized.

The meeting was the first in a series of three focused specifically on the Tier 3 recommendations. The staff gave presentations on preliminary plans for Fukushima Near-Term Task Force (NTTF) Recommendation 3, "Potential Enhancement to the Capability to Prevent or Mitigate Seismically-Induced Fires and Floods," and NTTF Tier 2 and 3 Emergency Preparedness Recommendations (Parts of Recommendations 9, 10, and 11) and additional recommendations associated with pre-staging of potassium iodide beyond 10 miles and Emergency Planning Zone (EPZ) Size. Following the individual staff presentations, the public had an opportunity to discuss the preliminary plans. The working groups will consider the public comments in developing the final plans for the Tier 3 recommendations. The draft program plans for comment, public meeting presentations, and written public comments are included in the meeting package.

#### Public Participation

In general, active discussions occurred after the staff presentations. Numerous comments were received in favor of expanding EPZ size and pre-staging potassium iodide. A representative from the State of Minnesota provided written comments. An industry representative encouraged the staff to make sure that Tier 3 activities do not unnecessarily distract industry activities for the higher priority Tier 1 activities; and suggested the staff not rush the planning for Tier 3 activities because on-going Tier 1 activities should inform Tier 3 actions (including the need for actions).
