SUBJECT: SUMMARY OF MAY 16-17, 2012, PUBLIC MEETING ON

On May 16 and 17, 2012, the U.S. Nuclear Regulatory Commission (NRC) staff held a public meeting<sup>1</sup> with the Nuclear Energy Institute (NEI) and industry representatives to review and assess the recommendations in the *Near-Term Task Force (NTTF) Recommendations for Enhancing Reactor Safety in the 21st Century* report, issued July 12, 2011.<sup>2</sup> The meeting was focused specifically on the NTTF Recommendations 2.3, flooding protection walkdowns, which are part of the Tier 1 recommendations under consideration for implementation without unnecessary delay. The main focus of this meeting was to discuss the draft walkdown guidance developed by NEI. The NRC staff had provided comments at a previous meeting<sup>3</sup> on May 10<sup>th</sup>. NEI had taken the comments from that meeting and made additional edits prior to the meeting. The meeting was started by stepping through the document that showed edits from NEI.<sup>4</sup> As comments were resolved, they were removed from the document. At the end of the meeting, the document was saved and provided to participants for final consideration.<sup>5</sup>

All remaining comments were addressed during the meeting. At the conclusion of the discussion of the comments, the remaining logistics were discussed. NEI indicated that they would take the resulting document, correct the formatting, and submit to the NRC on or before the following Monday. The NRC staff indicated that, if the final document was acceptable, May 31, 2012, was the target for endorsement.
