Southern Nuclear Operating Company
Vogtle Electric Generating Plant Units 3 and 4
Withdrawal of License Amendment and Exemption: Changes to the Structures and Layout of the
Annex Building, Turbine Building, and Radwaste Building (LAR-12-004)

Ladies and Gentlemen:

By letter dated April 5, 2012, Southern Nuclear Operating Company (SNC) submitted a license amendment request (LAR) for Vogtle Electric Generating Plant (VEGP) Units 3 and 4 combined licenses (COLs) (License Nos. NPF-91 and NPF-92, respectively). The proposed amendment would depart from VEGP Units 3 and 4 COLs Appendix C plant-specific material and plant-specific Design Control Document (DCD) Tier 1 and Tier 2 material by changing various: (1) Annex Building column line designations; (2) Turbine Building layout details; (3) Turbine Building elevations and associated wall thicknesses; and (4) Radwaste Building layout details.

On May 22, 2012, the NRC informed SNC that the LAR does not request approval of certain Tier 2 changes as required by 10 CFR 52, Appendix D, Section VIII.B.5.a and does not contain technical information in sufficient detail to support approval of those Tier 2 changes. SNC has reviewed the provisions identified by the NRC and agrees that additional information is warranted. As such, SNC requests withdrawal of the LAR and associated exemption request from NRC review pursuant to 10 CFR 2.107. SNC intends to resubmit the amendment request and associated exemption request with additional technical information to support a requested approval of the Tier 1, corresponding COL, and the involved Tier 2 changes.

SNC is notifying the State of Georgia of this LAR withdrawal by transmitting a copy of this letter to the designated State Official.
