Ref. 1: Letter, Pedro Salas (AREVA NP Inc.) to Document Control Desk (NRC), "List of Planned Topical Report Submittals for FY2012 through FY2014," NRC:12:020, April 13, 2012.

Ref. 2: Letter, John R. Jolicoeur (NRC) to Pedro Salas (AREVA NP Inc.), "Request for List of Planned Topical Report Submittals for FY2012, FY2013, and FY2014," March 19, 2012.

Ref. 3: Letter, Anthony W. Robinson (AREVA NP Inc.) to Document Control Desk (NRC), "U.S. EPR Design Certification Schedule for Responses to Open Items," NRC:12:008, February 21, 2012.

The letter in Reference 1 was submitted to the NRC in response to a request made by the NRC (Reference 2). It provided the status of AREVA NP Inc.'s (AREVA NP) Topical Reports (TRs) that are being developed for future submittal to the NRC for FY2012 through FY2014. Attachment A to this letter provides an update to the Reference 1 listing of future AREVA NP TRs. This transmittal also includes a listing of TRs that have been transmitted to the NRC for review, but have not yet received a final Safety Evaluation Report from the NRC (Attachment B).

The listing of AREVA NP Topical Reports Planned for Submittal in Attachment A includes the scheduled submittal dates by month and year. Per the NRC's request (Reference 2), the following information is also provided:

- If it will apply to operating plants, new reactors, or both,
- The estimated number of licensed facilities planning to use the approved TR, and
- Any specific dates for operating plant(s) or new reactor type(s) intending to include the safety evaluation in licensing actions once the TR is approved by the staff.

The listing of submitted TRs in Attachment B includes a description of the current state of the review for each submitted report.

There are no fee exemption requests under Section 170.11 of Title 10 of the Code of Federal Regulations that are expected to be made related to the reports in the attached listings.

T010

The schedules for U.S. EPR-related TRs and revisions have been provided to the NRC NRO by separate letter (Reference 3) as part of the ongoing Design Certification Review effort. As a result, U.S. EPR-related TRs are not duplicated in the attached listings.
