Don & Jeff,

As noted during the LBE meeting on May 16th, we believe that the regulatory precedents in the RGs and SRPs show that AOO releases are summed with the normal operation releases and compared on a best estimate basis to the annual offsite dose limit.

In response to the meeting action item, I have attached a reference listing that was developed by the NGNP Regulatory Affairs team.

Please contact me if you have any questions.

Regards,
Mark
