MEMORANDUM TO: Robert J. Pascarelli, Chief
Projects Management Branch
Japan Lessons-Learned Project Directorate
Office of Nuclear Reactor Regulation

FROM: Steven D. Bloom, Senior Project Manager */RA/*
Projects Management Branch
Japan Lessons-Learned Project Directorate
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF MAY 9, 2012, PUBLIC MEETING TO DISCUSS
THE DEVELOPMENT OF THE GUIDANCE FOR
IMPLEMENTATION OF ORDER EA-12-049, MITIGATION
STRATEGIES FOR BEYOND-DESIGN-BASIS EXTERNAL
EVENTS

On May 9, 2012, the U.S. Nuclear Regulatory Commission (NRC) held a public meeting with the Nuclear Energy Institute (NEI), industry representatives, and members of the public to discuss the development of the Interim Staff Guidance (ISG) for compliance with Order EA-12-049, Mitigation Strategies for Beyond-Design-Basis External Events.

The meeting started with the NRC making a presentation (Agencywide Documents Access and Management System (ADAMS) Accession No. ML12132A009), describing the review that the NRC staff had performed on NEI 12-06, "Diverse and Flexible Coping Strategies (FLEX) Implementation Guide, Revision B," which was submitted on May 4, 2012 (ADAMS Accession No. ML12128A124). The NRC staff discussed and asked questions about numerous areas and sections in the NEI guidance document. NEI either discussed the answer to the questions about the NEI document or in some of the areas; NEI stated that they would have to get back to the NRC staff at the next public meeting.

NEI made a presentation (ADAMS Accession No. ML12132A004) on the Diverse & Flexible Coping Capability (FLEX) Guidance document, which they submitted. They discussed how the document addresses the electrical distribution systems, and the concept of mitigation in all modes of operation.

During the presentation, it was determined that at the next public meeting on May 15, 2012, the following topics would be discussed:

- Spent fuel pool conditions, including more information about spray
- Instrumentation needed for reactor coolant system inventory and core temperature
- Backup power supplies for hydrogen igniters
- Table 12-1, portable diesel generator as primary and alternate means for powering pumps

- Boiling water reactor Mark I and Mark II early venting
- Evaluations being performed by the Owners Groups

The meeting concluded with questions from the public and stakeholders.

Enclosure:
List of Attendees
