MEMORANDUM TO: Those on the Attached List

FROM: John D. Kinneman, Director **/RA/ M.Bailey for**  
Division of Fuel Cycle Safety  
and Safeguards  
Office of Nuclear Material Safety  
and Safeguards

SUBJECT: UPDATING THE ELIGIBLE FACILITIES LIST

The Office of Nuclear Materials Safety and Safeguards (NMSS) has initiated the annual process of updating the U.S. Nuclear Regulatory Commission's (NRC's) portion of the U.S. Eligible Facilities List (EFL). Under the U.S.– International Atomic Energy Agency (IAEA) Safeguards Agreement, the United States is required to provide the IAEA with a list of all U.S. Nuclear Facilities not associated with activities of direct national security significance to the United States. The NRC is responsible for maintaining the list of all eligible NRC-licensed facilities as defined by Title 10 of the *Code of Federal Regulations* 75.4<sup>1</sup>.

Your staff is requested to carefully review the 2011 NRC-portion of the EFL, found in Agencywide Documents Access and Management System (ADAMS) under ADAMS Accession Number ML12157A558, to ensure its completeness and accuracy. Should your staff identify any facilities for potential inclusion or removal, you are requested to note the reason for the proposed addition or removal. Additionally, please ensure that there is consistency between the U.S. Eligible Facilities List and other public documents (e.g. NRC Information Digest).

The list is divided into the following ten sections:

1. Operating Commercial Nuclear Power Reactors;
2. Commercial Nuclear Power Reactors Under Construction with Application for an Operating License;
3. Commercial Nuclear Power Reactors, Applications Received;
4. Research Reactors and Critical Assemblies;
5. Conversion Plants;
6. Fuel Fabrication and Processing Plants;
7. Separate Storage Facilities;
8. Other Nuclear Activities;
9. Enrichment Plants; and
10. Source Material Facilities.

CONTACT: Eric Freeman, FCSS/NMSS  
(301) 492-3231

David Hanks, FCSS/NMSS  
(301) 492-3210

---

<sup>1</sup> Facility means: (1) a production facility or utilization facility; (2) a uranium hexafluoride production plant; (3) a fuel fabrication plant; (4) an independent spent fuel storage installation; (5) any facility used for separating the isotopes of uranium or enriching uranium; or (6) any location licensed to possess one or more effective kilogram of nuclear material.

Installations that should be identified for potential inclusion in the list are:

1. installations that have been issued a license;
2. entities that have submitted a license application; and
3. entities with whom the NRC is in discussions concerning future licensing actions.

Installations that should be identified for removal from the list are:

1. those installations for which their NRC license has been terminated, and
2. those installations undergoing decommissioning where all stored nuclear material has been removed.

Please respond via e-mail to Eric Freeman with the necessary corrections by July 27, 2012. Should you have any questions on the list or this request, please direct them to David Hanks or Eric Freeman at 301-492-3210, or 301-492-3231, respectively.

Thank you for your cooperation.
