Subject: CoC 9792- D1G Core Basket and Thermal Shield Shipping &
Storage
Container Authorized Contents

Ms. Rankin-- my letter NR:RR:WASandman G#12-02134 dated May 4, 2012 requested renewal of CoC 97992 for five years. In the letter, I provided as an enclosure a draft of our planned DOE CoC.

In a telephone conversation on June 7, you noted that the contents in our draft CoC has changed. As we discussed, I have confirmed that the only remaining containers/components are those that require shipment above an average daily temperature of plus 10 degrees.

If you have any additional questions, please give me a call
