Subject: RE: TRUPACT-III DRAFT CoC
Attachments: DRAFT 9305 R7-AFS.docx

I noticed one thing that is a leftover from Revision 5 of the certificate. On page 2, I added "or 16-mm" to describe the puncture-resistant plate in the overpack cover. The bottom end and overpack cover puncture-resistant plates have the same callout on the drawing, which is primarily item 19 (15 mm plate) with flag note 51 which allows optionally 16 mm plate. So for consistency, both descriptions should be the same. I yellow highlighted the description of the puncture-resistant plate used in the bottom end for your assistance in reviewing this. The change to the bottom end description was made in Rev. 5 and should have included the overpack cover as well. The rest of the CoC looks fine.

If you have any questions about this, please give me a call.

Importance: High

Hi Phil,

I have attached a draft copy of the TRUPACT-III CoC. Please review and provide any comments as soon as possible. After I hear from you, I will route it for final concurrence.

Thanks,
