Proposed changes to the instrumentation and controls (I&C) architecture were communicated to the NRC staff in the February 15, 2011 public meeting. The U.S. EPR Digital Protection System Technical Report provided in Reference 1 was revised to incorporate the revised I&C architecture, and was submitted in Reference 2. Revision 2 of this report (Reference 3) was a minor revision to address NRC feedback. Revision 3 of this report (Reference 4) incorporated additional NRC feedback. Additional NRC Staff feedback, in resolution of several Requests for Additional Information (RAI) since that submittal, has been incorporated into a revised "U.S. EPR Protection System Technical Report" (ANP-10309P), Revision 4, which is enclosed with this letter.

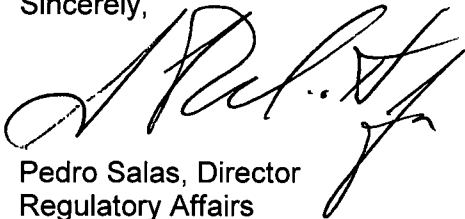

AREVA NP has incorporated this revised report by reference into the U.S. EPR Final Safety Analysis Report (FSAR) as part of the response to RAI 512, Supplement 3. AREVA NP requests that the NRC incorporate the review of this revised report into the evaluation of the I&C design in the Safety Evaluation Report for the U.S. EPR FSAR, in a manner consistent with other reports that are incorporated by reference into the U.S. EPR FSAR.

AREVA NP considers some of the material contained in the enclosure to be proprietary. As required by 10 CFR 2.390(b), an affidavit is enclosed to support the withholding of the information from public disclosure.
