Hospital Administration, 1 Main Hospital  
3800 Reservoir Road, N.W.  
Washington, DC 20007

**SUBJECT: NRC INSPECTION REPORT NO. 03035409/2012001, MEDSTAR  
GEORGETOWN MEDICAL CENTER, WASHINGTON, DISTRICT OF  
COLUMBIA**

Dear Mr. Sachtleben:

On March 5 and 6, 2012, Maryann Abogunde and Tara Weidner of this office conducted a safety inspection at the above address of activities authorized by the above listed NRC license. The inspection was an examination of your licensed activities as they relate to radiation safety and to compliance with the Commission's regulations and the license conditions. The inspection consisted of observations by the inspectors, interviews with personnel, and a selective examination of representative records. Additional information provided on March 7 and 27, 2012, was also examined as part of the inspection. A telephonic exit meeting was conducted on May 15, 2012, between you and other members of your staff, and Tara Weidner of this office, to discuss the findings of the inspection. The enclosed report presents the results of this inspection.

Based on the results of this inspection, three apparent violations were identified and are described in Section I.c. of the enclosed report. One of the apparent violations is being considered for escalated enforcement in accordance with the NRC Enforcement Policy. The current Enforcement Policy is included on the NRC's Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/enforce-pol.html>. The apparent violation being considered for escalated enforcement involved unsecured licensed material that was neither in storage nor under constant surveillance, as required by 10 CFR 20.1802. The second apparent violation involved documentation of training and experience for individuals approved and designated in writing by the Radiation Safety Committee (RSC) to work as authorized medical physicists (AMP). Specifically, documents collected by the Radiation Safety Officer and used to approve two individuals as AMPs were incomplete. The third apparent violation involved a medical physicist who was involved in high dose rate (HDR) clinical procedures without approval by the RSC. Specifically, the medical physicist had been acting as an AMP for HDR procedures without receiving authorization by the RSC for approximately 2 years. The circumstances surrounding these apparent violations, the significance of the issues, and the need for lasting and effective corrective action were discussed with members of your staff at the inspection exit meeting at the conclusion of the inspection. As a result, it may not be necessary to conduct a

predecisional enforcement conference (PEC) in order to enable the NRC to make an enforcement decision.

In addition, since your facility has not been the subject of escalated enforcement actions within the last 2 years, and based on our understanding of your corrective action, a civil penalty may not be warranted in accordance with Section 2.3.4 of the Enforcement Policy. The final decision will be based on your confirming on the license docket that the corrective actions previously described to the staff have been or are being taken.

Before the NRC makes its enforcement decision, we are providing you an opportunity to (1) respond to the apparent violations addressed in this inspection report within 30 days of the date of this letter or, (2) request a PEC. If a PEC is held, it will be open for public observation and the NRC will issue a press release to announce the time and date of the conference. If you decide to participate in a PEC, please contact James Dwyer at 610-337-5309 within 10 days of the date of this letter. A PEC should be held within 30 days of the date of this letter

If you choose to provide a written response, it should be clearly marked as a "Response to Apparent Violations in Inspection Report No. 03035409/2012001; EA-2012-085" and should include for each apparent violation: (1) the reason for the apparent violation, or, if contested, the basis for disputing the apparent violation; (2) the corrective steps that have been taken and the results achieved; (3) the corrective steps that will be taken to avoid further violations; and (4) the date when full compliance will be achieved. Your response may reference or include previously docketed correspondence, if the correspondence adequately addresses the required response. If an adequate response is not received within the time specified or an extension of time has not been granted by the NRC, the NRC will proceed with its enforcement decision or schedule a PEC.

If you choose to request a PEC, the conference will afford you the opportunity to provide your perspective on the apparent violations and any other information that you believe the NRC should take into consideration before making an enforcement decision. The topics discussed during the conference may include the following: information to determine whether a violation occurred, information to determine the significance of a violation, information related to the identification of a violation, and information related to any corrective actions taken or planned to be taken in presenting your corrective actions, you should be aware that the promptness and comprehensiveness of your actions will be considered in assessing any civil penalty for the apparent violations.

In addition, please be advised that the number and characterization of apparent violations described in the enclosed inspection report may change as a result of further NRC review. You will be advised by separate correspondence of the results of our deliberations on this matter.

Current NRC regulations and guidance are included on the NRC's website at [www.nrc.gov](http://www.nrc.gov); select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Regulations, Guidance and Communications**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays). In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter, its enclosure, and your response, if you choose to provide one, will be made available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management
