Ted,

Attached is the revised report that addresses concerns raised by NRC during the April 3 teleconference and subsequent communications. Please contact me if you have additional questions or concerns.

Regards,
Tom

Tom,
Per my phone call . . . below is Hans summary of the meeting . . . and a request to talk to your geologist . . . **Is tomorrow (Thursday) morning at 11 (EST) possible?**

"Ted, some of the more important points discussed yesterday and to be included in the revised submittal:

- RESRAD parameter input summaries (PDF files suffice) of the exposure scenarios and the sensitivity analyses;
- information and the characteristics of the groundwater encountered at 33' below grade in BH 01
- log boring information for BH 01 from 20' thru 50'
- information and the characteristics of the limestone bedrock encountered at 33' below grade in BH 02 and BH 03

And, if possible, Lifeng and I would also like to briefly talk to the geologist who completed the drilling logs.

Thanks, Hans"

Ted Carter
