Application Revision 2

1/20/2012

Bell Bend

PPL Bell Bend LLC.

Docket No. 52-039

SRP Section: 02.02.03 - Evaluation of Potential Accidents

Application Section: 2.2.3

Request for Additional Information No. 5962

QUESTIONS for Siting and Accident Consequence Branch (RSAC)

02.02.03-11

RG 1.206 provides guidance regarding the information that is needed to ensure potential hazards in the site vicinity are identified and evaluated to meet the siting criteria in 10 CFR 100.20 and 10 CFR 100.21. In an October 12, 2010 letter, the COL applicant addressed the COL FSAR changes due to BBNPP Plot Plan Changes and provided COL FSAR version Rev.2a. The revised FSAR identified and described an additional facility in Section 2.2.2.2.5, the UGIES Hunlock Propane Air Plant, consisting of eighteen 90,000 gallon tanks of propane onsite, at a distance of 9.2 miles northeast of BBNPP. The potential hazards due to this facility have not been evaluated and addressed in the "Evaluation of Potential Accidents" in COL FSAR Section 2.2.3. Please provide an evaluation addressing the potential hazards from this newly identified facility within 10 miles of BBNPP.
