

U.S. NUCLEAR REGULATORY COMMISSION

# DESIGN-SPECIFIC REVIEW FOR mPower™ iPWR REACTOR

## CHAPTER 7

### PROPOSED TABLE OF CONTENTS

- 7.0 Introduction and Overview of Review Process
- 7.1 Fundamental Design Principles
  - 7.1.1 Independence
  - 7.1.2 Redundancy
  - 7.1.3 Determinism
  - 7.1.4 Diversity and Defense-in-Depth
- 7.2 System Characteristics
  - 7.2.1 Quality
  - 7.2.2 Software Development
  - 7.2.3 Equipment Qualification
  - 7.2.4 Reliability and Integrity
  - 7.2.5 Interlocks, Bypasses, and Permissives
  - 7.2.6 Derivation of System Inputs
  - 7.2.7 Setpoints
  - 7.2.8 Auxiliary Features
  - 7.2.9 Control of Access
  - 7.2.10 Identification
  - 7.2.11 Interaction between Sense and Command Features and Other Systems
  - 7.2.12 Multiunit Stations
  - 7.2.13 Automatic and Manual Control
  - 7.2.14 Displays and Monitoring
- 7.3 System Design
  - 7.3.1 Safety Systems
  - 7.3.2 Nonsafety Systems
- 7.4 Conformance to Regulations
  - 7.4.1 10 CFR 50.55a(h)(3)
  - 7.4.2 General Design Criteria
  - 7.4.3 10 CFR 50.34(f)(2)—Three Mile Island Action Items

## 7.5 ITTAC

APP A Evaluation of Hazard Analysis

APP B Overall Architecture

APP C Simplicity

APP D References
