U.S. NUCLEAR REGULATORY COMMISSION

Amendment No. 29

MATERIALS LICENSE

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 39, 40, and 70, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

Licensee	In accordance with the letter dated June 6, 2012,
1. Liga Puertorriqueña Contra el Cáncer	3. License number 52-13471-01 is amended in its entirety to read as follows:
2. P.O. Box 191811 San Juan, Puerto Rico 00919-1811	4. Expiration date December 31, 2021
	5. Docket No. 03003532 Reference No.

6. Byproduct, source, and/or special nuclear material	7. Chemical and/or physical form	8. Maximum amount that licensee may possess at any one time under this license
A. Palladium 103 permitted by 10 CFR 35.400	A. Sealed Sources (IsoAid, L.L.C. Model IAPd-103A)	A. 1 curie
B. Iodine 125 permitted by 10 CFR 35.400	B. Sealed Sources (International Brachytherapy SA Model 1251L; IsoAid, L.L.C. Model IAI-125A)	B. 2.5 curies
C. Iridium 192	C. Sealed Sources (Best Medical International, Inc. Model 81-01 Series)	C. 1 curie
D. Depleted Uranium	D. Metal	D. 550 kilograms

9. Authorized use:

A. and B. Any manual brachytherapy procedure permitted by 10 CFR 35.400.

C. Possession and storage only, as manual brachytherapy sources, until the license is amended to authorize clinical use permitted by 10 CFR 35.400.

D. Shielding in linear accelerators.

CONDITIONS

10. Licensed material may be used or stored only at the licensee's facilities located in the Radiotherapy Department (basement) and inpatient brachytherapy rooms at Hospital Oncológico Dr. Isaac Gonzalez Martínez, Bo. Monacillos, Centro Médico, Rio Piedras, Puerto Rico.

11. The Radiation Safety Officer for this license is Myria Roque-Palacios.

Amendment No. 29

12. Licensed material is only authorized for use by, or under the supervision of:

    A. Individuals permitted to work as an authorized user in accordance with 10 CFR 35.13 and 35.14.

    B. The following individuals are authorized users for medical use as indicated:

Authorized Users	Material and Use
Carlos Chévere-Mouriño, M.D.	35.400; Iridium 192 in storage; Depleted Uranium
Julio Diaz-Padilla, M.D.	35.400; Iridium 192 in storage; Depleted Uranium
Ricardo López-Mujica, M.D.	35.400; Iridium 192 in storage; Depleted Uranium
José R. Santana-Rabell, M.D.	35.400; Iridium 192 in storage; Depleted Uranium
Roberto J. Santiago Méndez, M.D.	35.400; Iridium 192 in storage; Depleted Uranium

13. Sealed sources or detector cells containing licensed material shall not be opened or sources removed from source holders by the licensee.

14. The licensee shall conduct a physical inventory every six months, or at other intervals approved by the U.S. Nuclear Regulatory Commission, to account for all sources and/or devices received and possessed under the license. Records of inventories shall be maintained for 5 years from the date of each inventory and shall include the radionuclides, quantities, manufacturer's name and model numbers, and the date of the inventory.

15. For sealed sources not associated with 10 CFR Part 35 use, the following conditions apply:

    A. Sealed sources shall be tested for leakage and/or contamination at intervals not to exceed six months or at the intervals specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under 10 CFR 32.210 or under equivalent regulations of an Agreement State.

    B. In the absence of a certificate from a transferor indicating that a leak test has been made within the intervals specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under 10 CFR 32.210 or under equivalent regulations of an Agreement State, prior to the transfer, a sealed source received from another person shall not be put into use until tested and the test results received.

    C. Sealed sources need not be tested if they contain only hydrogen-3; or they contain only a radioactive gas; or the half-life of the isotope is 30 days or less; or they contain not more than 100 microcuries of beta- and/or gamma-emitting material or not more than 10 microcuries of alpha-emitting material.

Amendment No. 29

D. Sealed sources need not be tested if they are in storage and are not being used; however, when they are removed from storage for use or transferred to another person and have not been tested within the required leak test interval, they shall be tested before use or transfer. No sealed source shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.

E. The leak test shall be capable of detecting the presence of 0.005 microcurie (185 becquerels) of radioactive material on the test sample. If the test reveals the presence of 0.005 microcurie (185 becquerels) or more of removable contamination, a report shall be filed with the U.S. Nuclear Regulatory Commission in accordance with 10 CFR 30.50(c)(2), and the source shall be removed immediately from service and decontaminated, repaired, or disposed of in accordance with Commission regulations.

F. Tests for leakage and/or contamination, including leak test sample collection and analysis, shall be performed by the licensee or by other persons specifically licensed by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services.

G. Records of leak test results shall be kept in units of microcuries and shall be maintained for 5 years.

16. The licensee is authorized to transport licensed material in accordance with the provisions of 10 CFR Part 71, "Packaging and Transportation of Radioactive Material."

Amendment No. 29

17. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. This license condition applies only to those procedures that are required to be submitted in accordance with the regulations. Additionally, this license condition does not limit the licensee's ability to make changes to the radiation protection program as provided for in 10 CFR 35.26. The U.S. Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.

A.	Application dated June 21, 2011	[ML111880093]
B.	Facsimile dated November 21, 2011 (except Item 7)	[ML113400381]
