Adrian

After looking into the language used in the subject HFE commitment in the F3 FSAR and the language used in Section 14.3A of the ESBWR DCD, I better understand the staff's comment on the "system basis" language in this commitment. Understand we will be discussing this in tomorrow's open items call.

We are on board with replacing "on a system basis" to "on an element by element basis".

Will this change fully address the staff's concern?

Thanks
Mike Brandon
