---

Dr. Kolodziej,

Thank you for this news. I hope that you are talking about a Surety bond, as discussed in appendix a.9 of NUREG-1757, volume 3. Please make sure that you also obtain all the other required documents [1) Surety bond, 2) Standby trust agreement, and 3) copy of the broker/agent power of attorney authorizing the broker/agent to issue the bond]. The amount of the surety bond should equal or exceed the required coverage level, and the company issuing the bond should be qualified as described in Section A.9.1. The Standby Trust Agreement needs to be established in case the funds are needed, and should be written as described in Section A.17.

We look forward to receiving the required originally signed duplicate of the Surety Bond and Standby Trust Agreement, with all their supporting documentation.

Thanks,  
Betsy

Subject: Decommissioning Bond

Dear Mrs. Ullrich: I believe we have very great news. I was informed few hours ago that International Cyclotrons would be granted the decommissioning bond, not later than early next week. We had a very strenuous week but it has been quite worthy and we feel happy about it. A side-effect would be competitive prices for FDG and clients will be greatly relieved. Thank you again for your concerns and efforts!
