Due to the extent of proprietary information contained in these documents, CS Innovations, LLC was not required to submit a non-proprietary version.

The affidavit stated that the submitted information should be considered exempt from mandatory public disclosure for the following reasons:

- (a) The information reveals the distinguishing aspects of a process (or component, structure, tool, method, etc.) where prevention of its use by any of CS Innovations' competitors without license from CS Innovations constitutes a competitive economic advantage over other companies.
- (b) It consists of supporting data, including test data, relative to a process (or component, structure, tool, method, etc.), the application of which data secures a competitive economic advantage, e.g., by optimization or improved marketability.
- (c) Its use by a competitor would reduce his expenditure of resources or improve his competitive position in the design, manufacture, shipment, installation, assurance of quality, or licensing a similar product.
- (d) It reveals cost or price information, production capacities, budget levels, or commercial strategies of CS Innovations, its customers or suppliers.
- (e) It reveals aspects of past, present, or future CS Innovations or customer funded development plans and programs of potential commercial value to CS Innovations.
- (f) It contains patentable ideas, for which patent protection may be desirable.
