

VINCE R. VERMEUL

Senior Research Engineer

Environmental Systems Group, Earth Systems Science Division

Energy and Environment Directorate, Pacific Northwest National Laboratory

Education

B.S. Agricultural Engineering, Oregon State University, Corvallis, Oregon, 1988

M.S. Civil Engineering (Environmental), Oregon State University, Corvallis, Oregon, 1990

Experience

Mr. Vermeul has 20 years of experience in hydrologic and geochemical characterization, designing, instrumenting, conducting, and managing field tests, interpreting hydrologic test data, and developing/demonstrating groundwater remediation technologies. Since joining Pacific Northwest National Laboratory in 1990, Mr. Vermeul has gained the following experience:

- Key contributor on several interdisciplinary teams developing innovative groundwater remediation technologies including: 1) manipulation of in situ redox conditions to create a permeable reactive barrier (PRB) to prevent migration of groundwater contaminants, 2) injection of colloidal-scale ZVI for source area treatment and PRB installation, 3) emplacement of injectable apatite to create a PRB for containment of strontium-90 contaminated groundwater, 4) In situ uranium stabilization through phosphate amendment injection/infiltration, 5) In situ biostimulation for the creation of a reducing barrier, and 6) the use of shear-thinning fluids for improved delivery or retention of remedial amendments. Primary technical contribution to these technology development projects has been hydrologic and geochemical characterization of the field test sites, design/integration of systems required to deploy and monitor the technologies at the field-scale, performance assessment of the in situ treatment technologies, management of field operations, and technology transfer.
- Key contributor on DOE-SC Integrated Field Research challenge project focused on providing improved understanding of mass transfer processes.
- MVA program lead for FutureGen2 Carbon Capture and Storage (CCS) project
- Conducted numerous remedial investigations at Department of Energy, Department of Defense, and Environmental Protection Agency sites.
- Hydrology subject matter expert for environmental and safety reviews of combined construction and operating license applications for new commercial nuclear plants (Levy Nuclear Plant).
- Experienced in the development and interpretation of regional and local-scale groundwater flow and contaminant transport models, including both forward and inverse modeling approaches.
- Project management experience in remedial investigation, technology development, and predictive simulation projects.

Professional and Educational History

- 2000 - Pres. Senior Research Engineer II, Environmental Systems Group, Earth Systems Science Division, PNNL, Richland WA.
- 1996 - 2000 Senior Research Engineer I, Field Hydrology & Chemistry Group, Environmental Technology Directorate, PNNL, Richland WA.
- 1992 – 1996 Research Engineer, Geosciences Department, Environmental Technology Division, PNNL, Richland WA.
- 1990 – 1992 Engineer, Hydrology Section, Geosciences Department, PNNL, Richland WA.
- 1988 – 1990 Graduate studies in Environmental Engineering. Emphasis: Groundwater hydrology – Numerical modeling of groundwater flow and solute transport - Water quality/hazardous waste – Information management with geographical information systems.
- 1984 – 1988 Undergraduate studies in Agricultural Engineering. Emphasis: Surface and groundwater hydrology - Water resource management and development - Fluid mechanics and hydraulic design.

Awards and Professional Affiliations

Trained in Hazardous Waste Operations, HAZWOPER Supervisor, and Medic First Aid

R&D 100 Award, 1998, Development of the In Situ Redox Manipulation Technology

PNNL Outstanding Performance Award, ISRM technology field demonstration

PNNL Outstanding Performance Award, Transient inverse groundwater modeling

PNNL Outstanding Performance Award, Proposal Generation/Business Development with EPA

BHI Gold Award, ISRM deployment for remediation of Cr(VI) contaminated groundwater

U. S. Patent 6,438,501; Flow Through Electrode with Automated Calibration

Certified by the Oregon State Board of Engineering Examiners as an Engineer-in-Training.
