

VOID SHEET

TO: License Fee Management Branch

FROM: RIII - Materials Licensing Branch

SUBJECT: VOIDED APPLICATION

Control Number: 576804

Applicant: Aptuit, LLC.

License Number: 24-15595-01

Docket Number: 030-09415

Date Voided: May 11, 2012

Reason for Void: NRC staff completed its acceptance review and determined that the Decommissioning Plan (DP) submitted as part of the licensing action did not contain sufficient information to allow the staff to begin a detailed technical review. The submitted DP did not contain a sufficiently detailed description of the current conditions of the site to evaluate the acceptability of the plan. Based on the limited characterization data provided with the DP, the NRC staff could not make a determination on the scope of decontamination and decommissioning (D&D) activities that are warranted to make the site suitable for unrestricted use. Furthermore, the DP did not contain sufficient detail of the methods to be used to ensure protection of workers and the environment against radiation hazards during decommissioning. Procedures for performing D&D activities were not included as part of the DP. Lastly, a description of the planned final radiation survey was not included in the DP.

A letter sent to the licensee dated May 11, 2012 (ML12132A374) contains a more detailed description of why the DP was not accepted for full technical review. This action is hereby voided.
