

UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION IV
1600 EAST LAMAR BLVD
ARLINGTON, TEXAS 76011-4511

July 2, 2012

Matthew W. Sunseri, President and
Chief Executive Officer
Wolf Creek Nuclear Operating Corporation
P.O. Box 411
Burlington, KS 66839

SUBJECT: WOLF CREEK GENERATING STATION - NOTIFICATION OF INSPECTION
(NRC INSPECTION REPORT 05000482/2012004) AND REQUEST FOR
INFORMATION

Dear Mr. Sunseri:

From August 20 – August 31, 2012, Reactor Inspectors from the U.S. Nuclear Regulatory Commission's (NRC) Region IV office will perform the baseline inspection of changes, tests, experiments, and permanent plant modifications at Wolf Creek Generating Station, using NRC Inspection Procedure 71111.17, "Evaluations of Changes, Tests, Experiments, and Permanent Plant Modifications."

Experience has shown that this inspection is resource intensive both for the NRC inspectors and your staff. In order to minimize the impact to your onsite resources and to ensure a productive inspection, we have enclosed a request for documents needed for this inspection. Upon review of these documents, the inspectors will select additional documentation for review upon arrival. It is important that all of these documents are up to date and complete in order to minimize the number of additional documents requested during the preparation and/or the onsite portions of the inspection.

We have discussed the schedule for these inspection activities with your staff and understand that our regulatory contact for this inspection will be Mr. William Muilenberg of your regulatory affairs organization. If there are any questions about this inspection or the material requested, please contact the lead inspector Ronald Kopriva at 817-200-1104 or by email (ron.kopriva@nrc.gov).

This letter does not contain new or amended information collection requirements subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.). Existing information collection requirements were approved by the Office of Management and Budget, control number 3150-0011. The NRC may not conduct or sponsor, and a person is not required to respond to, a request for information or an information collection requirement unless the requesting document displays a currently valid Office of Management and Budget control number.

M. Sunseri

- 2 -

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

/RA/

Thomas R. Farnholtz, Chief
Engineering Branch 1
Division of Reactor Safety

Evaluations of Changes, Tests, or Experiments and Permanent Plant Modification

Inspection Dates: August 20 – August 31, 2012

Inspection Procedures: IP 71111.17 “Evaluation of Changes, Tests, or Experiments and Permanent Plant Modifications”

Inspectors: Ron Kopriva, Senior Reactor Inspector, Lead Inspector
John Watkins, Reactor Inspector
Isaac Anchondo, Reactor Inspector

Information Requested for sample selection and the In-Office Preparation Week

The information in Section I and Section II should be sent to the Region IV office in hard copy or electronic format (Certrec database preferred), in care of Ron Kopriva. To facilitate the selection of specific items that will be reviewed during the onsite inspection week, please submit Section I by July 30, 2012 and Section II by August 13, 2012. We ask that you categorize the documents in your response with the numbered list below. If requested documents are large and only hard copy formats are available, please inform the inspectors. If you have any questions regarding this information request, please call the lead inspector as soon as possible.

Section I (Information by July 30, 2012)

The first group lists information necessary for our initial inspection scoping. Upon review of these documents, the inspectors will select a number of samples greater than required sample size. This will allow for the inspectors to focus on the most safety significant requests.

Note: Description of screenings should be of sufficient detail that inspectors can determine the significance of the issue.

1. A list with descriptions, of all 10 CFR 50.59 screenings (or equivalent) performed since July 1, 2009, which did not result in an evaluation.
2. A list with descriptions, of all 10 CFR 50.59 evaluations performed which did not result in an application for license amendment to NRC and meet the following criteria from July 1, 2009 to the present.
 - Updated Final Safety Analysis Report changes that have been updated in accordance with 10 CFR 50.71(e)(4)
 - Modifications that are field work complete
 - Changes to calculations that have been issued
3. A list with descriptions of all permanent plant modifications dating from July 1, 2009. For this inspection, permanent plant modifications include permanent plant changes, design changes, setpoint changes, procedure changes, equivalency evaluations, suitability analyses, calculations, and commercial grade dedications.

4. A list with descriptions of all Corrective Action documents related to 50.59 activities, including screenings and evaluations and your permanent plant modification program and its implementation since July 1, 2009.

Section II (Information by August 13, 2012)

The second group of documents requested is needed to support our in-office preparation week and our on-site inspection activities. It is also requested that corrective action documents and responses to questions developed during the inspection be provided to the inspector as the documents are generated.

5. Complete documentation/packages pertaining to the requested 50.59 screens, 50.59 evaluations, modifications, and corrective action documents to support final sample selection.
6. Wolf Creek Generating Station procedures for conducting 10 CFR 50.59 screenings and evaluations. Please include any revisions during the last 3 years, and when these revisions were active.
7. A listing of personnel qualified to prepare 10 CFR 50.59 screenings and evaluations, including qualification dates.
8. A listing of personnel qualified to review and approve 10 CFR 50.59 screenings and/or evaluations, including qualification dates.
9. A copy of any training materials for the 10 CFR 50.59 screeners and/or evaluators.
10. Wolf Creek Generating Station procedures for implementing and controlling permanent plant modifications.
