NRC NAMES NEW SENIOR RESIDENT INSPECTOR AT MILLSTONE NUCLEAR PLANT

Nuclear Regulatory Commission officials in King of Prussia, Pa., have selected Josephine Ambrosini as the new Senior Resident Inspector at the Millstone nuclear power plant in Waterford, Conn. Ambrosini joins Resident Inspectors Jim Krafty and Brian Haagensen at Millstone, which is operated by Dominion Nuclear.

Most recently, Ambrosini was a Resident Inspector at the Oyster Creek nuclear plant in Lacey Township, N.J. She joined the NRC's Region I office in 2000 after earning a bachelor's degree in chemical engineering from Villanova University. After completing a rigorous NRC inspector qualification program, she worked as a reactor inspector at plants throughout the Northeast. Ambrosini then was accepted into the NRC Graduate Fellowship Program through which she earned a master's degree in chemical engineering from Villanova. Upon her return to the agency, she performed inspections of independent spent fuel storage installations and other materials facilities. She has also worked as a project engineer.

"Jo Ambrosini has the training, experience and commitment to safety that will help the NRC carry out its mission of protecting people and the environment, and ensure Dominion safely operates Millstone Station," said NRC Region I Administrator Bill Dean.

Each U.S. commercial nuclear power plant site has at least two NRC Resident Inspectors. They serve as the agency's eyes and ears at the facility, conducting regular inspections, monitoring significant work projects, and interacting with plant workers and the public. Inspectors can serve up to seven years at any one site.

The Millstone resident inspectors can be reached at 860-447-3170.
