Subject: Davis-Besse public meeting 11/23

Good afternoon,

The NRC is making arrangements for a public meeting to be held tomorrow afternoon at the Davis-Besse Administration Building from 2-5pm (CST). The meeting will address the issue of cracks discovered in the shield building of the facility; FirstEnergy will give a presentation explaining their safety assessment and the NRC will respond. This will be a category II public meeting (public comments and questions will occur after the licensee and NRC have presented). There will be phone lines available for individuals to conference into the meeting.

I will send out details for participation and a press release as soon as possible.
