RE: East Impoundment (Evaporation Pond) Leak, Cameco Resources,  
 Smith Ranch-Highland Uranium Project, Permit to Mine No. 633

Dear Mr. Spackman:

On November 7, 2011, Power Resources, Inc. d/b/a Cameco Resources (Cameco) provided verbal notification to the Wyoming Department of Environmental Quality, Land Quality Division (LQD) and the Nuclear Regulatory Commission (NRC) regarding a leak into secondary containment (sump) discovered on November 4, 2011 at the East Impoundment, referred to as Evaporation Pond in Permit 633, Volume 1, Section 5.5.5. Written notification followed in the Monthly Update dated November 30, 2011

Since the discovery of water in the sump, samples have continued to be taken on a weekly and monthly basis, when obtainable. Results are provided in the tables below.

As reported in previous monthly updates, sulfate analysis is being done at an external lab.

Cameco continues to examine the liner and work toward a solution. A plan for relining of the impoundment network was outlined in the May monthly update. Currently Cameco has ordered materials for the repairs. Cameco would welcome the opportunity to provide an overview of plans to LQD staff on site during the next site inspection. Routine monitoring will continue to be conducted and a monthly report will be submitted and progress will be reported to the WDEQ.

Please contact me at (307) 358-6541 ext. 476 or [Kenneth\\_Garoutte@cameco.com](mailto:Kenneth_Garoutte@cameco.com) if you have questions.

Sincerely,

KEN GAROUTTE By
