

SAFETY INSPECTION REPORT AND COMPLIANCE INSPECTION

1. LICENSEE/LOCATION INSPECTED: Scheurer Hospital 170 N. Caseville Road Pigeon, MI 48755 REPORT NUMBER(S) 2012-001		2. NRC/REGIONAL OFFICE Region III U. S. Nuclear Regulatory Commission 2443 Warrenville Road, Suite 210 Lisle, IL 60532-4352		
3. DOCKET NUMBER(S) 030-35444	4. LICENSE NUMBER(S) 21-32250-01	5. DATE(S) OF INSPECTION <i>June 26, 2012</i>		

LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- 1. Based on the inspection findings, no violations were identified.
- 2. Previous violation(s) closed.
- 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, to exercise discretion, were satisfied.

Non-cited violation(s) were discussed involving the following requirement(s):

- 4. During this inspection, certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited in accordance with NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.
(Violations and Corrective Actions)

Statement of Corrective Actions

I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

PROGRAM SCOPE

This licensee was a small community hospital and authorized to use licensed material permitted by Sections 35.100, 35.200, and 35.300. The nuclear medicine department was staffed with one full-time technologist who performed approximately 80-100 diagnostic procedures monthly. These included a full spectrum of studies. The licensee received unit doses from a licensed radiopharmacy. The licensee administered therapeutic radiopharmaceuticals on one or two occasions annually; these cases were limited to hyperthyroid treatments. The licensee obtained its radioiodine in capsule form. The licensee retained the services of a consultant physicist who audited the radiation safety program quarterly (last 4/5/2012).

This inspection consisted of interviews with select licensee personnel; a review of select records; a tour of the nuclear medicine department; and independent measurements. The inspector observed the administration of one procedure for a gall bladder study. The inspection included observations of dose calibrator QA checks, security of byproduct material, use of personnel monitoring, and surveys.
