SUBJECT Content of Public Meeting on Use of Expired Packages				
SUMMARY (Continue on Page 2)				
<p>Chris Allen called Michael Flagg of the University of Missouri Research Reactor (MURR) at 5:30 P.M. EST. He notified Mr. Flagg that the purpose of the call was to clarify the type of information in which the Nuclear Regulatory Commission staff would be interested. Using a letter addressed to Mr. Krause of GE Hitachi Nuclear Energy (ML12172A197) as a guide, Chris Allen identified the type of information on which the discussion should focus was contained in criteria 3a, 3b, and 3c of Regulatory Information Summary 2008-18 (ML081920729). During the discussion, Chris Allen explained that staff wanted to know if MURR had determined that an alternative package, approved either by the NRC or by a foreign competent authority, was available. In addition, Chris Allen stated that staff would like to know if MURR investigated the feasibility of reconfiguring the contents to be shipped such that the regulations in Part 71 of Title 10 of the Code of Federal Regulations could be satisfied. Finally, Chris Allen articulated that MURR should also identify if shipments could be adjusted and that staff preferred MURR present information on actual shipments and not forecasted shipments. Anticipating that MURR would likely address these issues during the public meeting, Chris Allen discouraged Mr. Flagg from offering any information at the beginning of the call; however, at the end of the phone call, Mr. Flagg was given the opportunity to provide any information he thought would be of interest at this time. Mr. Flagg declined and expressed his appreciation for the phone call. The call ended at approximately 5:45 P.M. EST.</p>
