Subject: Davis Besse Shield Building Issue

Good afternoon Eric,

I understand that during an ET meeting today a question related to the non-structural concrete of the shield building (SB) at Davis Besse was raised and you were following up on that. As the acting PM for Davis Besse, please feel free to run plant related questions through me. I know at times its easier to just do it yourself so in those cases please copy me as well as Mike and Nick on any emails or meetings just so DORL can stay in the loop.

I can follow up on the concrete question if you let me know what yall were asking unless you already got the answer.

Thanks,

Pete Hernandez
