Technical Assistance in Support of Containment Liner Corrosion Modeling

On July 6, 2012, as a result of a noncompetitive acquisition, a cost-plus-fixed-fee type contract (No. NRC-HQ-12-C-04-0069) was awarded to Southwest Research Institute of San Antonio, TX for technical assistance in support of containment liner corrosion modeling. The period of performance is from July 9, 2012, to March 31, 2013, with no option periods. The total estimated value of the contract is \$324,308.

Technical Corrections; Final Rule; 10 CFR Chapter I (RIN 3150-AJ16; NRC-2012-0092)

On July 6, 2012, the NRC published a final rule in the *Federal Register* (77 FR 39899) amending its regulations to make technical corrections, including updating the street address for its Region I office; correcting authority citations and typographical and spelling errors; and making other edits and conforming changes. This rule is effective August 6, 2012.

Technical Assistance for Electronic Documentation and Tracking of Comments and Dispositions Related to Subsequent License Renewals

On July 11, 2012, as a result of a noncompetitive acquisition, a cost-plus-fixed-fee type contract (No. NRC-HQ-12-C-03-0052) was awarded to Southwest Research Institute of San Antonio, TX. This contract will provide for technical assistance in support of electronic documentation tracking of comments and dispositions related to subsequent license renewals. The period of performance is from July 11, 2012, to September 28, 2014, with three 1-year option periods. The total estimated value of the contract is \$262,937, inclusive of all options.

Low-Level Radioactive Waste Regulatory Management Issues; Public Meeting; Request for Comment; 10 CFR Part 61 (RIN-3150-AI92; NRC-2011-0012)

On July 11, 2012, the NRC published a notice in the *Federal Register* (77 FR 40817) announcing plans to conduct a public meeting to discuss proposed changes to its current regulatory requirements as directed by the Commission in a January 19, 2012, Staff Requirements Memorandum. Information will be gathered from invited subject matter experts, stakeholders, and other interested members of the public regarding these proposed changes. The NRC staff is interested in understanding issues associated with specifying a regulatory time of compliance for a low-level radioactive waste disposal facility, allowing licensees the flexibility to implement waste acceptance criteria as an alternative to the current waste classification system, and revising the NRC's licensing requirements for land disposal of radioactive waste. The public meeting will be held on July 19, 2012, in Rockville, MD. Comments are requested by July 31, 2012.

Controlled Unclassified Information

On July 11, 2012, staff from the Information and Records Services Division attended a working group meeting at the Controlled Unclassified Information Office (CUIO), National Archives and Records Administration. The purpose of the meeting was to continue development of a policy for safeguarding, dissemination, and decontrol of CUI. After many months of discussions regarding possible safeguarding criteria, the CUIO has finalized a first draft of a safeguarding policy and will be sending it to agency CUI contacts for review and comment in the near future. Discussions continued regarding dissemination policy. The CUIO will consider the points made and revise the proposed policy for the next meeting. Discussions began on the decontrol policy with the CUIO presenting its straw man. The CUIO will make changes to its straw man and present the updated proposal at the next meeting. The next CUI Working Group meeting will take place on July 26, 2012.

Freedom of Information Act (FOIA) and Privacy Act (PA) Requests Received During the Period of July 6, 2012 - July 12, 2012:

Lester E. Cox Medical Center, all documents relating to the compliance with NRC	FOIA/PA-2012-0279
All documents including violations, inspections, contingency plans, testing/monitoring, spills, emergencies, concerning E.R. Squibb & Sons/Bristol-Myers Squibb 1969-1989	FOIA/PA-2012-0280
Nuclear Automation radioactive material license	FOIA/PA-2012-0281

St. Lucie, Unit 1, Extended Power Uprate Approved

On July 9, 2012, the St. Lucie, Unit 1, Extended Power Uprate (EPU) amendment was approved. The amendment increases the maximum steady-state reactor core power level from 2700 megawatts thermal (MWt) to 3020 MWt, which is an increase of approximately 11.85 percent. Florida Power & Light Company (FPL) submitted the EPU amendment on November 22, 2010, and the staff has approved the licensee's application after numerous meetings, phone calls, and application supplements. FPL plans to implement the EPU during the next several months.

Meeting with AREVA NP Canada

On July 12, 2012, the staff met with representatives from AREVA NP Canada to discuss testing programs and technology developments on wet and dry filtered containment venting systems.

Office of Public Affairs (OPA)
Items of Interest
Week Ending July 13, 2012

OPA received significant media inquiries on the following:

The swearing-in of the new NRC Chairman Allison M. Macfarlane.

The preliminary white finding at Brown Ferry nuclear plant (AL).

The Indian Point nuclear plant (NY) license amendment that allows fuel transfer from the Unit 3 pool to the Unit 2 pool and subsequently into dry cask storage; decommissioning fund status following the waste confidence decision updates.

The Duke/Progress merger and the performance of the Progress nuclear units.

The NRC issuance of a Confirmatory Action Letter to Honeywell Metropolis Works and their agreement to suspend operations until safety concerns at the facility have been resolved.

The Nine Mile Point nuclear plant Unit 2's (NY) manual shut down due to decrease in condenser vacuum.

Other Public Affairs Items:

OPA supported the following activities:

- OPA spoke with local media about the restart of Palisades nuclear plant (MI).
- Phone interview with WATD-FM radio about recent Atomic Safety and Licensing Board (ASLB) ruling denying a request for a hearing on two NRC post-Fukushima orders filed by the Pilgrim Watch Organization.
- Facilitated an interview with *Power Engineering* magazine with three Office of Nuclear Reactor Regulation (NRR) Digital Instrument and Control (I&C) experts. They discussed the history of industry efforts to upgrade to digital systems.

OPA issued blog posts:

- NRC Enhances its Fight Against Counterfeits.
- Nuclear Utility Mergers and the NRC.
- New NRC Chairman Sworn in Today.

OPA Issued YouTube Video:

- NRC Q&A Series: Three Minutes with NRC Meteorologist.
