---

Hello Bob

We have received Revision 8 of the Physical Protection Plan for Low Strategic Significance in CD format, as submitted by your letter REL:12:030, dated June 28, 2012.

We are therefore suspending review of Revision 7 of the Plan, which was begin under TAC L33219. TAC L33219 is closed.

We have opened TAC L33228 for review of Revision 8. Based on current workload of staff in the Office of Nuclear Security and Incident Response, we would expect to complete the review by the end of December 2012. We will promptly advise you of any changes to this schedule.

If you have any questions, just ask.

Nick Baker, Acting Chief  
Fuel Manufacturing Branch  
301-492-3128
