Subject: Alt Source Term for Fuel Handling Accident Amendment request (WBN-TS-11-19) deficiencies need to be supplemented
Date: Tuesday, July 24, 2012 11:29:00 AM

Terry,

During the acceptance for review process of your June 13, 2012 amendment request, we identified the following deficiencies that need to be supplemented to your submittal before we can proceed with the review:

- What operator actions, if any, were added, deleted, or changed, including actions credited in the UFSAR Accident Analysis.
- Changes, additions, or deletions of procedures for these affected operator actions, if any.
- Changes, additions, or deletions to training for these affected operator actions, if any.

We are requesting a conference call with you ASAP to see if you can provide this supplement in less than 10 days.
