July 23, 2012

Docket No. 03032691  
Control No. 577795

License No. 29-28739-01

Tariq Bashir, P.E.  
President/Radiation Safety Officer  
Gentech Engineering Associates, P.C.  
160 Route 35 North  
Cliffwood Beach, NJ 07735

SUBJECT: GENTECH ENGINEERING ASSOCIATES, P.C., LICENSE RENEWAL,  
CONTROL NO. 577795

Dear Mr. Bashir:

This refers to your application dated June 26, 2012, for renewal of your NRC license. Enclosed with this letter is the renewed license. **The renewed license is written in accordance with current NRC policy and includes significant changes in the conditions of the license. Specifically, Conditions 12 and 18 that appear in the prior amendments are removed from the renewed license (Amendment No. 06) because they are not applicable, and Condition 11 is revised in accordance with current NRC policy.**

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

The NRC expects licensees to conduct their programs with meticulous attention to detail and high standards of safety and compliance. Because of the serious consequences to employees and the public that can result from failure to comply with NRC requirements, you must conduct your program according to NRC regulations, the conditions of your NRC license, and the representations made in your application.

NRC will continue to conduct periodic inspections of your licensed activities. Failure to conduct your program safely and in accordance with NRC regulations, license conditions, and the representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, imposition of a civil penalty, or an order suspending, modifying or revoking your license.

Please be reminded that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.

2. Notify the NRC in writing of any change in mailing address.
3. In accordance with 10 CFR 30.36(d), notify the NRC, promptly, in writing, and request termination of the license when you decide to terminate all activities involving materials authorized under the license.
4. Request and receive an amendment to your license before you:
  - a) change Radiation Safety Officer named on the license;
  - b) order byproduct material in excess of the amount, or radionuclide, or form different than authorized on the license;
  - c) add or change the areas of use, or addresses of use identified in the license application or on the license; or
  - d) change the name or ownership of your organization.
5. Submit a complete renewal application or termination request at least 30 days before the expiration date of your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of byproduct material after your license expires is a violation of NRC regulations.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Current NRC regulations and guidance are included on the NRC's website at [www.nrc.gov](http://www.nrc.gov); select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits**, see our **toolkit index page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).

Thank you for your cooperation.

Sincerely,

***Original signed by Sattar Lodhi, Ph.D.***
