| Data Qualifiers* |   |
|------------------|---|
| b -              | analyte detected in method blank                    |
| d -              | RL increased due to sample matrix interference      |
| h -              | analysis performed past recommended hold time       |
| j -              | not detected above minimum detectable concentration |
| l -              | lowest available reporting limit for method used    |

\* Note: data qualifiers are used with individual sample results, where applicable, throughout the individual well summary tables.
