Subject: RE: Davis Besse shield building cracks

Thanks, Herman,

In addition to the presentation, the following files in the same share drive will provide you with the full picture.

Folder: Current Evaluation, File: DBNPS CR-0442 Mode Hold – this contains the licensee's technical assessment.
Folder: Questions and Responses, File: SB-0036 – includes observations and comments from the two professors consulted by the licensee.

These documents will provide all the necessary background information on the problem. Please let me know if you have any questions. Please copy Elba Sanchez and Jim Neurauter on the emails – as I will be out of office in training starting tomorrow and may not be able to check emails frequently. Elba (630 829 9715) is the RIII contact person for this issue.

Thanks, and let me or Elba know if you have any questions / comments.

Vijay,

Ok, I will take a look at the documents.

Hi Herman,
Please take a look at the two presentations under the presentation folder in the shared drive linked above.
Thanks
-vijay
