On July 24, 2012, the U.S. Nuclear Regulatory Commission (NRC) staff held a public meeting<sup>1</sup> with the Nuclear Energy Institute (NEI) and industry representatives to discuss addressing the recommendations in the *Near-Term Task Force (NTTF) Recommendations for Enhancing Reactor Safety in the 21st Century* report, issued July 12, 2011.<sup>2</sup> The meeting was focused specifically on the NTTF Recommendation 2.1, flooding hazard reanalysis, which is one of the Tier 1 recommendations under consideration for implementation without unnecessary delay. By letter dated March 12, 2012, the NRC issued an information request<sup>3</sup> pursuant to Title 10 of the *Code of Federal Regulations* 50.54(f) to implement this recommendation.

The NRC staff began by discussing the current outline for the interim staff guidance on performing an integrated assessment.<sup>4</sup> As part of the presentation of the outline, the NRC staff also discussed NEI's input on how an integrated assessment should be performed.<sup>5</sup>

Additionally, in support of the meeting, NEI provided responses to questions they had fielded internally<sup>6</sup> and a guidance document on performing flood hazard reevaluations.<sup>7</sup> The NRC staff did not provide any specific feedback on these documents.
