Subject: A few more timeline questions

Michael,

Here are a few more questions that will help me fill in the final details on the timeline.

What is the date that the in-situ pressure testing of the Unit 3 SG, 3E0-88, was completed? How many tubes in this SG were in-situ pressure tested?

What are the start and end dates of in-situ pressure testing for the 3E0-89 SG? How many tubes were in-situ pressure tested in this SG?

Thanks,

Andy Johnson
