(Combined License))	

**FLORIDA POWER & LIGHT COMPANY’S ANSWER OPPOSING
CASE’S MOTION FOR LEAVE TO FILE A NEW CONTENTION**

I. INTRODUCTION

Pursuant to 10 C.F.R. § 2.309(h)(1), Applicant Florida Power & Light Company (“FPL”) hereby answers and opposes Citizens Allied for Safe Energy, Inc.’s (“CASE”) Motion for Leave to File a new Contention Concerning Temporary Storage and Ultimate Disposal of Nuclear Waste at Turkey Point Nuclear Power Plant, filed on July 10, 2012 (“Motion”).¹ The Motion seeks admission of a new contention concerning temporary storage and ultimate disposal of nuclear waste at Turkey Point Units 6 & 7 (“the Turkey Point Units”) based on a June 8, 2012 decision of the United States Court of Appeals for the District of Columbia Circuit.² That decision remanded for further proceedings certain issues related to the Commission’s Waste Confidence Decision Update and Temporary Storage Rule.

¹ The Motion is dated July 9, 2012 but was not filed until July 10. It is substantially identical to a motion filed on July 9, 2012 by intervenors Mark Oncavage, Dan Kipnis, Southern Alliance for Clean Energy, and National Parks Conservation Association (“Joint Intervenors”). FPL is responding separately to the Joint Intervenors’ motion. Similar motions have been filed in a number of pending Commission licensing proceedings.

² *New York v. NRC*, 681 F.3d 470 (D.C. Cir. 2012) (“*NY v. NRC*”).

As further discussed below, CASE is no longer a party to this proceeding because the Atomic Safety and Licensing Board (“Board”) has dismissed all of its contentions and terminated its participation in the proceeding. Therefore, CASE is not entitled to file a new contention or seek other relief and its Motion should be denied on that basis.

Even if CASE’s filing were permissible, the Board should deny the Motion and reject the underlying contention, or otherwise certify the proposed contention to the Commission for resolution. The mandate in *NY v. NRC* has not yet issued, hence the Motion impermissibly seeks to challenge a Commission rule that remains in effect. Although, as of the date of this Response, the Commission had not yet indicated how it will address the remanded issues, the Commission has typically handled such issues via a rulemaking. Should the Commission follow this course of action (and FPL believes it should do so), the contention would be inadmissible.³ The proposed contention also fails to meet the requirements for an admissible contention by raising issues outside the scope of the proceeding, and by failing to raise a genuine dispute on a material issue with FPL’s combined license application for the Turkey Point Units.

II. DISCUSSION

A. CASE is not a Party and is not Entitled to File New Contentions in this Proceeding

CASE is no longer a party to the COL proceeding for the Turkey Point Units and thus cannot seek the admission of new contentions herein. On March 29, 2012, the Board dismissed the last pending CASE contentions and “because it no longer has a contention or an unresolved pleading pending before this Licensing Board, we dismiss CASE from this proceeding.”

Memorandum and Order (Denying CASE’s Motions to Admit Newly Proffered Contentions 9

³ In the event the mandate issues without Commission direction on how it will address the remand issues, the Board should certify the claims raised by CASE to the Commission because the claims are generic in nature.

and 10, and Dismissing CASE from this Proceeding), LBP-12-07, 75 NRC __ (Mar. 29, 2012), slip op. at 22. Despite being advised of its right to seek Commission review of its dismissal, *id.*, CASE failed to do so.

Nowhere in its Motion does CASE acknowledge its status as non-party; CASE also fails to seek reinstatement in this proceeding.⁴ CASE apparently believes it can continue to take an active part in a proceeding from which it has been dismissed.

That is of course not so. The Commission's rules are clear that, aside from being permitted to make oral or written limited appearance statements in a proceeding, nonparties "may not otherwise participate in the proceeding." 10 C.F.R. § 2.315(a). This limitation means that, unless otherwise authorized by the Commission or presiding officer, a nonparty motion will not be entertained. *Metropolitan Edison Co.* (Three Mile Island Nuclear Station, Unit No.1), CLI-83-25, 18 NRC 327, 330, 333 (1983); *see also Carolina Power & Light Co.* (Shearon Harris Nuclear Power Plant), Memorandum and Order, 1986 WL 328110, at *1 (July 11, 1986) (unpublished) (holding that a petitioner whose intervention petition is denied "is not a proper party to seek a stay of any Licensing Board action in this operating license proceeding").

A dismissed party seeking reinstatement must satisfy the criteria for untimely petitions to intervene in order to be readmitted. *General Electric Co.* (GETR Vallecitos), LBP-84-54, 20 NRC 1637, 1642-43 (1984). Those criteria are set forth in 10 C.F.R. § 2.309(c)(1) and include eight factors that need to be considered in evaluating the reinstatement request.⁵ CASE has not

⁴ CASE accompanies its Motion with several declarations of individuals who reside in the vicinity of the Turkey Point Units. The purpose of these submittals is unclear, for they do nothing to remedy CASE's status as a dismissed party.

⁵ 10 C.F.R. § 2.309(c) states: (c) Nontimely filings. (1) Nontimely requests and/or petitions and contentions will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the request and/or petition and contentions that the request and/or petition

addressed these factors and there is no indication that, if evaluated by the Board, they would warrant allowing CASE to rejoin the proceeding.⁶ Therefore, its Motion should be denied.

B. The Proposed Contention Impermissibly Challenges a Commission Regulation

Should the Board consider CASE's Motion, the Board should reject the Motion and the proposed contention because they constitute an impermissible attack on a Commission regulation. The proposed contention asserts that the Environmental Report ("ER") for the Turkey Point Units does not satisfy the National Environmental Policy Act because it does not include a discussion of the environmental impacts of spent fuel storage after cessation of operation, including the impacts of spent fuel pool leakage, spent fuel pool fires, and failing to establish a spent fuel repository, and that unless and until the NRC conducts such an analysis, no license may be issued. The Waste Confidence Rule, 10 C.F.R. § 51.23(b), which remains in

should be granted and/or the contentions should be admitted based upon a balancing of the following factors to the extent that they apply to the particular nontimely filing:

- (i) Good cause, if any, for the failure to file on time;
- (ii) The nature of the requestor's/petitioner's right under the Act to be made a party to the proceeding;
- (iii) The nature and extent of the requestor's/petitioner's property, financial or other interest in the proceeding;
- (iv) The possible effect of any order that may be entered in the proceeding on the requestor's/petitioner's interest;
- (v) The availability of other means whereby the requestor's/petitioner's interest will be protected;
- (vi) The extent to which the requestor's/petitioner's interests will be represented by existing parties;
- (vii) The extent to which the requestor's/petitioner's participation will broaden the issues or delay the proceeding; and
- (viii) The extent to which the requestor's/petitioner's participation may reasonably be expected to assist in developing a sound record.

⁶ To the contrary, factors (v) through (viii) strongly militate against permitting CASE to reinsert itself into this proceeding via the contention propounded in the Motion. If, as anticipated, the waste confidence issue is handled generically, CASE can provide comments in a future rulemaking proceeding (factor v). Its interests on this issue are adequately covered by Joint Intervenors' motion to admit an identical contention (factor vi). And, as demonstrated by CASE's previous conduct in this case, its participation can only delay the proceeding and is unlikely to assist in developing a sound record (factors vii and viii). *See, e.g.,* Memorandum and Order (Denying CASE's Motion to Reconsider Rejection of Amended Contentions and to Admit two Newly Proffered Contentions, and Denying FPL's Request to Impose Remedial Measures on CASE) (Sep. 21, 2011) (unpublished) slip op. at 13-15.

effect as discussed below, provides that no such discussion is required. Consequently, the proposed contention is barred. 10 C.F.R. § 2.335(a).

As recognized in the Motion (Motion at 2), the mandate from the D.C. Circuit in *NY v. NRC* has not yet issued. Absent issuance of the mandate, the Commission's Waste Confidence Rule remains in effect. At the earliest, the mandate will not issue until August 29, 2012, seven days after the time period for requesting rehearing or rehearing *en banc* has expired. Fed. R. App. P. 41(b).⁷ Should the NRC or any other party to the case seek rehearing or rehearing *en banc*, issuance of the mandate will be further delayed. *Id.* And, if rehearing or rehearing *en banc* is granted, the mandate may not issue for a long time, if at all. Accordingly, the Motion and the proposed contention impermissibly seek to challenge an effective Commission rule and thus should be rejected on that basis alone.

Nor should the proposed contention be held in abeyance until issuance of the mandate, as CASE suggests (*see* Motion at 2). Generally, for a contention to be held in abeyance, it must otherwise be admissible. *Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-09-8, 69 NRC 317, 322 (2009); *PPL Bell Bend, LLC* (Bell Bend Nuclear Power Plant), LBP-09-18, 70 NRC 385, 407 (2009); *Detroit Edison Co.* (Fermi Nuclear Power Plant, Unit 3), LBP-09-16, 70 NRC 227, 251 (2009); *Conduct of New Reactor Licensing Proceedings; Final Policy Statement*, 73 Fed. Reg. 20,693, 20,972 (Apr. 17, 2008). Thus, “[i]f the contention is inadmissible in the first instance, as is the case here, no further action is required on the part of the Board.” *South Carolina Electric & Gas Co.* (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC 1, 10 (2010). That is the case here as well.

⁷ The D.C. Circuit has extended the time to file a petition for rehearing or rehearing *en banc* until August 22, 2012. *New York v. NRC*, No. 11-1045 (D.C. Cir. July 6, 2012), Order (*per curiam*).

C. The Motion and the Proposed Contention Impermissibly Seek to Raise an Issue Subject to a Rulemaking

In addition to the fact that the Motion and the proposed contention seek to challenge a valid rule, the Board should reject them because, if the mandate issues, the Commission is likely to address issues raised in the D.C. Circuit remand generically through a rulemaking. The Commission has long held that a contention that seeks to litigate a matter that is, or is about to become, the subject of a rulemaking is inadmissible. *Southern Nuclear Operating Co.* (Vogle Electric Generating Plant, Units 3 and 4), CLI-11-08, 74 NRC ___, slip op. at 19 & n.68 (Sep. 27, 2011) (citing *Potomac Electric Power Co.* (Douglas Point Nuclear Generating Station, Units 1 and 2), ALAB-218, 8 AEC 79, 85, 89 (1974)). Here, consistent with longstanding Supreme Court⁸ and Federal court⁹ precedent approving of the use of rulemaking to evaluate the environmental impacts from spent nuclear fuel, the Commission will most likely address the issues raised in *New York v. NRC* generically, via rulemaking. As the Commission has previously explained, “[i]n the area of waste storage, the Commission largely has chosen to proceed generically.”¹⁰ Moreover, predating the Court’s decision, the Commission already has underway a plan for preparation of a generic environmental impact statement and rulemaking assessing the safety and environmental impacts of longer term HLW storage.¹¹ Accordingly, absent any indication that the Commission intends to abandon its generic assessment of spent fuel storage, the proposed contention is inadmissible.

⁸ *Baltimore Gas & Elec. Co. v. NRDC*, 462 U.S. 87, 100-01 (1983).

⁹ *Minnesota v. NRC*, 602 F.2d 412, 416-17 (D.C. Cir. 1979).

¹⁰ *Duke Energy Corp.* (Oconee Nuclear Station, Units 1, 2, and 3), CLI-99-11, 49 NRC 328, 343 (1999).

¹¹ SRM-SECY-09-0090: Final Update of the Commission's Waste Confidence Decision (Sep. 15, 2010) (requiring the NRC Staff, apart from the final waste confidence rule update, to initiate a study to update the rule to account for waste storage onsite and/or at offsite storage facilities for 200-300 years or more).

D. The Board Should Certify the Contention to the Commission if there is Uncertainty as to how the Remanded Issues will be Addressed

In the event the mandate issues and it is uncertain whether the Commission will address generically the implications of the *New York v. NRC* decision, the Board should certify this matter to the Commission for review pursuant to 10 C.F.R. § 2.319(l). Certifying the matter to the Commission for review would avoid any unnecessary expenditure of resources considering a contention that will likely be rendered inadmissible by future Commission action.

Certification to the Commission is warranted for another reason. Currently pending before the Commission is a Petition to Suspend Final Decisions in All Pending Reactor Licensing Proceedings Pending Completion of Remanded Waste Confidence Proceedings (June 18, 2012) (“Petition”) filed by CASE and some twenty-three other individuals and organizations (including Joint Intervenors) in this and eighteen other proceedings. Although the Commission has not yet ruled on the Petition, the Petition addresses essentially the same substantive issues that are raised in the proposed contention. Indeed, the contention propounded by the instant Motion asserts that “unless and until the NRC conducts such an analysis [of the impacts of spent fuel storage after permanent cessation of operations], no license may be issued.” Motion at 4. Clearly, the Motion and its underlying contention are, in essence, a request for suspension of final decision-making in this proceeding. Certifying CASE’s proposed contention to the Commission would ensure that the contention’s resolution is consistent with the Petition’s resolution, as well as the resolution of the essentially identical proposed contentions and suspension petitions filed in numerous other licensing proceedings.

E. The Proposed Contention does not Meet Commission Admissibility Requirements

1. The Proposed Contention Raises Issues Beyond the Scope of this Proceeding

Should the Board decide to rule on the Motion, it should reject the propounded contention because it seeks to raise issues not properly within the scope of this proceeding. 10 C.F.R. § 2.309(f)(1)(iii). The Commission’s rules prescribe that environmental contentions must be based on the applicant’s documents and on the data and conclusions in the NRC Staff’s draft or final environmental impact statements. 10 C.F.R. § 2.309(f)(2). Contrary to this requirement, the proposed contention asserts that “no license may be issued” unless certain analyses can be performed. Motion at 4. This assertion is not a challenge to the application or the Staff’s environmental documents. Rather, it is a roundabout way of seeking suspension of the final licensing decision herein. CASE appears to recognize as much, because, as previously noted, it has already filed such a suspension request with the Commission. *See* Petition. The contention is thus beyond the permissible scope of admissible contentions.

2. The Contention Fails to Raise a Genuine Dispute on a Material Issue

The proposed contention also fails to raise a genuine dispute with the Turkey Point Units’ environmental report (“ER”). 10 C.F.R. § 2.309(f)(1)(vi). There is no requirement in Part 51 for a license applicant to update an originally compliant ER in light of subsequent events. *Pacific Gas & Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-11-32, 74 NRC ___, slip op. at 13 (Nov. 18, 2011);¹² *Pacific Gas & Electric Co.* (Diablo Canyon Nuclear Power

¹² On referral from the Board, the Commission declined to review the Board’s ruling that an applicant has no duty to supplement an ER. *Pacific Gas & Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-12-13, 75 NRC ___, slip op. at 7 & n.31 (June 7, 2012).

Plant, Units 1 and 2), LBP-12-13, 75 NRC ___, slip op. at 6 (June 27, 2012) (“LBP-12-13”).¹³ 10 C.F.R. § 51.50 specifies the contents of a combined license application’s ER (including compliance with Sections 51.45, 51.51, and 51.52), and there is no requirement that an applicant supplement the ER. *See* 10 C.F.R. § 51.45(a) (“An applicant . . . *may* submit a supplement to an [ER] at any time”) (emphasis added). Absent any requirement in Part 51 for an applicant to supplement an originally compliant ER based on subsequent events and information, “subsequent events and information (regardless of how ‘significant’) are simply *not material* to the compliance status of the ER” and “do not create a ‘genuine dispute’ as to the compliance status of the ER.” LBP-12-13 at 6 (emphasis in original). “[B]ecause an applicant has no duty to supplement its ER [based on subsequent information], there is no deficiency that can form the basis of a contention.” *Id.* at 8. Consequently, the issues that CASE seeks to litigate fail to raise a genuine dispute on a material issue with the Turkey Point Units’ COL application.

III. CONCLUSION

For the above stated reasons, the Motion and the proposed contention should be rejected.
