Southern Nuclear Operating Company
Vogtle Electric Generating Plant Units 3 and 4
Retraction of plans to Credit International Performance of
First Plant Only and First Three Plant Only tests for Vogtle Units 3&4

Ladies and Gentlemen:

The U.S. Nuclear Regulatory Commission (NRC) issued the Vogtle Electric Generating Plant (VEGP) Units 3 and 4 combined licenses (COLs) (License Nos. NPF-91 and NPF-92, respectively) to Southern Nuclear Operating Company (SNC) on February 10, 2012.

On December 12, 2011, Southern Nuclear Operating Company (SNC) sent letter ND-11-2382 to the Nuclear Regulatory Commission (NRC). In that letter, SNC described plans to utilize specific portions of the Initial Test Program (ITP) in China (Sanmen Units 1&2 and Haiyang Unit 1) to satisfy the requirement to perform First Plant Only and First Three Plant Only tests (FPOT and F3POT) at Vogtle Units 3&4. These special tests, described in Section 14.2.5 of the Updated Final Safety Analysis Report (UFSAR), have also been specifically called out in proposed ITP license conditions for COL applicants referencing the AP1000 Design Certification.

Since that time, SNC has had regular interactions with Westinghouse Electric Company, LLC (WEC) and the NRC to determine the feasibility of pursuing this alternative to performing those tests at Vogtle Units 3 and 4. Based on review of WEC's recommendations to not credit China testing and independent review of risks associated with pursuit of this alternative, SNC has decided not to pursue FPOT and F3POT testing credit for VEGP Units 3 and 4 based on FPOT and F3POT tests conducted in China.

This letter contains no NRC commitments. If you have any questions regarding this letter, please contact Mr. Wes Sparkman at (205) 992-5061.
