Subject: RE: KC Wagner support

SOARCA: KC did the vast majority of the MELCOR analysis for Surry. He also helped out with the mitigation measures assessment for Surry.

Also, Katie Wagner (not related to KC) told me last week that KC is supposed to be working on a new project that Richard Lee's branch started with Sandia on MELCOR analysis of thermally induced Steam Generator Tube Rupture. Katie is the PM for this new project.

Can you list what work you had with SNL that involved KC wagner. We are going for a PO with Dycoda however is there any other specific area where we need his specific support and how are you getting it?

I would like this info by COB today so that we can also discuss it with SNL on how they will be able to continue the work without waiting until May/June 2011

Thanks,

Pat
