Hello Tony

This message is to acknowledge that we have received your request to amend license SNM-42 for the revised FNMC Plan sent by your letter 12-090, dated July 31, 2012

All copies have been received by their NRC addressees, and are withheld from the public after separation from the cover letter.

We have opened TAC number L33230 for this effort, and expect to complete our review of the changes by February 2013. We will immediately notify you of any changes to this schedule.

If you have any questions, just ask.
