NUCLEAR REGULATORY COMMISSION

REGION III  
2443 WARRENVILLE ROAD, SUITE 210  
LISLE, IL 60532-4352

JUL 23 2012

Jeffrey J. Murphy  
Radiation Safety Officer  
City of Midland – Michigan  
333 West Ellsworth Street  
Midland, Michigan 48640-1647

Dear Mr. Murphy:

Enclosed is Amendment No. 09 renewing your NRC Material License No. 21-20078-01 in accordance with your request.

Please note that the following have been revised: (1) License Condition 13 has been revised to include Subitem F regarding the requirement for leak test records and (2) License Condition 17 addresses security criteria for portable nuclear gauges has been modified in its entirety to incorporate additional security measures.

In addition, we have removed Condition 11.B with regard to the future RSO. Please note that you must request and obtain a license amendment before you change the RSO. Also, we have removed Condition 18 of your license with regard to the decommissioning financial assurance requirement. Based on the total possession limit, this condition is not applicable to the scope of your program. These changes appear in bold font.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with Title 10 Code of Federal Regulations 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

A handwritten signature in black ink, appearing to read "Frank P.D. Tran". The signature is fluid and cursive, with a long horizontal stroke at the end.

Frank P.D. Tran
