**SUBJECT**

License No.: 21-26687-01 Control No. 575857  
-----

**SUMMARY**

Renewal

Telephone conversation with Mr. Robert W. Boyd (RSO). Discussed the use of licensed material. Mr. Boyd indicated that they were currently not using license material, but wanted to continue the license and be able to use licensed material based on the need of his researchers. I indicated to Mr. Boyd that the license would be renewed as a standby license for possession and storage and that the license would need to be amended when licensed material is needed to be used. Mr. Boyd agreed with this approach and indicated that he would have ample lead time before license material was requested from his researchers for use and would amend the license.
