Subject: Indian Point position

August 19, 2012  
To Whom It May Concern  
Re: Indian Point - spent fuel rods

I am a physician who practices in Tarrytown.  
I am not a member of any political group or organization.  
I have nothing against nuclear energy or nuclear power plants.

Indian Point has repeatedly demonstrated that its number one goal is low overhead.  
Indian Point has no incentive to function in a safe manner, and it does not function in a safe manner.  
While it is abundantly clear that the mandate of the NRC is extremely limited, the NRC does have the discretion to not offer exemptions, exceptions, delays to fuel rod disposal. Please do the right thing and compel this "disaster waiting to happen" to shut down.

James Hellerman MD  
200 South Broadway, Tarrytown, NY 10591

DOCKETED  
USNRC
