Subject: NRC request for additional information - Termination for Connecticut Oncology & Hematology
Date: Thursday, August 23, 2012 3:55:00 PM

Licensee: Connecticut Oncology & Hematology
License No.: 06-31418-01
Docket No.: 030-38340
Mail Control: 577810

Ms. Shomsky,

In order to support the termination request for the above listed license, we need the following additional information:

1. Completed and signed NRC Form 314. The form may be found at <http://www.nrc.gov/readingrm/doc-collections/forms/nrc314.pdf>
2. Provide documentation of transfer and leak tests for all sealed sources possessed at this facility. This may include dose calibrator sources (barium, cesium, and cobalt), camera check sources (cobalt, germanium, cesium), and well counter and survey instrument check sources (cesium).
3. The termination request letter was signed by you. Please be aware that the letter needs to be reviewed and signed by senior management. Please confirm that you are a senior management representative. Alternatively, please have senior management review and concur with the statements made in the letter dated July 3, 2012, and sign the completed NRC Form 314.

You may fax this information to my attention to 610-337-5269. Please reference Mail Control No. 577810 in your response. If we do not receive a response within 30 days, we will assume you no longer require the license termination and will void your request.

Please send a return e-mail to confirm that you received this message.

Please note that the office of the Region I Division of Nuclear Materials Safety has moved effective May 9, 2012. Our new address is:

U. S. Nuclear Regulatory Commission
Region I
2100 Renaissance Blvd, Suite 100
King of Prussia, PA 19406-2713

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Thank you for your assistance,

Maryann Abogunde
Medical / Health Physicist
U.S. NRC Region 1
