**Subject:** Acceptance Review of Turkey Point Units 3 and 4 - application to correct technical specification for Control Room Ventilation Emergency system (TAC Nos. ME9211 and ME9212)

**Importance:** High

Bob,

By letter dated August 7, 2012, Florida Power and Light Company (the licensee) submitted for a license amendment request (LAR) to the Renewed Facility Operating Licenses (RFOL) for Turkey Point Units 3 and 4. The proposed LAR would correct a clerical error identified in the issued TS involving TS 3.7.5 Action "c" for Modes 5 and 6 that omitted an applicable footnote. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the request has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

The NRC staff has reviewed your application and concluded that it does provide technical information in sufficient detail to enable the NRC staff to complete its detailed technical review and make an independent assessment regarding the acceptability of the proposed amendment in terms of regulatory requirements and the protection of public health and safety and the environment. Given the lesser scope and depth of the acceptance review as compared to the detailed technical review, there may be instances in which issues that impact the NRC staff's ability to complete the detailed technical review are identified despite completion of an adequate acceptance review. If additional information is needed, you will be advised by separate correspondence.

If you have any questions, please contact me at (301) 415-1447 or via email by [farideh.saba@nrc.gov](mailto:farideh.saba@nrc.gov).
