---

Control No. 578121 (License No. 06-31462-01) should not have been controlled as an amendment request. The licensee's initial application (Control No.576729) did include the Humboldt gauges, but the reviewer overlooked the licensee's request and did not include the requested material in the license. A corrected copy of the license needs to be sent to the licensee (not an amendment). Please use control No. 576729 for the corrected copy.  
Thanks

Sattar Lodhi
