RECEIVED
REGION 1

Dear Becky:

This letter is to inform the NRC that we wish to terminate our radioactive materials license effective 9/30/2012. At that time our current practice will be closing and we will cease to perform nuclear medicine imaging.

On or before this date, we will transfer all our sealed sources to the PharmaLogic radiopharmacy located at 5842 B. Davis Creek Road in Barboursville, WV 25504-1004 who is appropriately licensed to possess radioactive materials under NRC RAML #: 47-25375-01MD. All unsealed radiation source shipping containers will be returned to the nuclear pharmacy and all radioactive waste held for decay-in-storage on-site will be surveyed, and, if found to be equivalent to background, will be disposed of with proper documentation, or, will be transferred to PharmaLogic. A copy of the current leak testing results indicating the absence of any leaking sources is attached for your review.

In accordance with 10 CFR 20, Subpart E, we will perform and document surveys to verify that all radioactive material has been removed from this location and that no residual or ALARA amounts of radioactivity remains prior to releasing the areas for general and unrestricted use. We shall submit documentation of these surveys to your office on or before 9/30/12.

Following removal of all radioactive material and with acceptable closeout survey results, all radioactive material postings and labels will be removed prior to the release of restricted areas for general and unrestricted use.

I certify that the above information is true and correct. We hope this request meets with your approval. Please contact me or our medical physicist (James Norweck, work cell 304-710-0172, jnorweck@radiology-inc.com) if there are any questions or if additional information is desired. Thank you.

Respectfully submitted,

PERSONAL INFORMATION WAS REMOVED
BY NRC. NO COPY OF THIS INFORMATION
WAS RETAINED BY THE NRC.
