To Bryan Parker and/or other Material Licensing Officer,

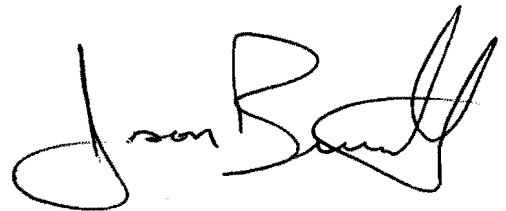

This is a formal written request for change in the authorized user section of material license number 24-26584-01 held by Dr. Hause of Associated Veterinary Specialists in St. Louis Missouri. The licensees wish to add Dr. Jason Brumitt as an authorized user. Dr. Brumitt has been working under the current radiation safety officer Dr. Michael Muhlbauer for the past two and a half years. During that time Dr. Brumitt has handled approximately 1500 mCi of radioactive iodine working both directly and indirectly under the supervision of Dr. Michael Muhlbauer. All of the material has been used to treat hyperthyroid veterinary patients.

Dr. Brumitt has a Bachelor of Science degree in Biology and a Doctor of Veterinary Medicine degree from the University of Missouri (1996-2003). He completed a Diagnostic Imaging residency and received a Master of Science in Veterinary Science at Washington State University (2006-2009). During this time he received extensive training in radioactive materials including taking a three day nuclear medicine short course from March 30-April 1, 2007 at the University of Tennessee as well as taking a semester long course on radioactive materials and nuclear pharmacy. Dr. Brumitt also had instruction with various radioactive compounds used for treatment and diagnostics during the three years of his residency and is now a board certified Diplomate of the American College of Veterinary Radiology.

Dr. Brumitt has animal handling experience from his academic and professional career.

Please feel free to contact Drs. Brumitt, Muhlbauer, or Hause directly regarding this matter.

Thank you for your time,

Drs. Jason Brumitt, Michael Muhlbauer and Wayne Hause
